<p>EYFS Interest Led Curriculum: This curriculum plan gives an overview of adult led activities that can take place alongside experiences that are planned in the moment. These will be an extension of a child's interests which has been observed, building on children's next steps and needs. Our skilled practitioners will be sensitive to the teachable moments and mindful of how they can extend children's thinking. Through this joint approach we will be fostering the Characteristics of Effective Learning giving children opportunities to play and explore, opportunities for active learning and to develop their critical thinking.</p>
